Summary

Software Engineer with 2+ years of experience building and shipping production web applications with the MERN stack and Next.js. Comfortable across the stack: REST API design, MongoDB, Docker, Linux VPS and AWS EC2 deployments, plus Java and Data Structures & Algorithms. Owned features end to end across 10+ live websites and web app modules.

Experience

The Purplebrick Consulting Jul 2025 – Present
Software Development Engineer *India*

- Built and shipped features end-to-end using **React.js, Next.js, Node.js, and JavaScript**, owning work from requirements and Figma designs through development, testing, and production release across **10+ production websites and web app modules**.
- Integrated **REST APIs** with backend services to render dynamic content, and collaborated with product, design, and backend engineers in a fast-paced startup-style environment.
- Deployed and managed applications on **VPS servers using Docker on Linux**, handling DNS configuration, environment setup, production troubleshooting, and releases; worked on **AWS EC2** instances for hosting.
- Improved page speed and scalability using **Google Lighthouse and PageSpeed** audits (Core Web Vitals), asset optimization, and cross-browser/responsive fixes.
- Used **Git/GitHub** workflows (branching, pull requests, code reviews) and AI-assisted tools to speed up debugging, documentation, and delivery without compromising code quality.

Techmind Software Jun 2024 – Jun 2025
Web Developer (Intern → Full-time) *India*

- Converted **15+ UI screens** into responsive, cross-browser-compatible web pages using HTML5, CSS3, JavaScript, Bootstrap, and WordPress/PHP.
- Debugged layout, plugin, and compatibility issues, and implemented UI improvements in collaboration with senior developers, improving consistency and usability.

Projects

CMS Platform | *MongoDB, Express.js, React.js, Node.js (MERN), Docker, Linux VPS*

- Designed and built a full-stack **Content Management System** on the MERN stack: RESTful Express/Node.js APIs, MongoDB data models, and a React.js interface for creating, editing, and publishing content.
- Containerized the application with **Docker** and deployed it on a **Linux VPS**, managing the server environment, DNS, and production releases end to end.
- Documented the architecture, schema decisions, and trade-offs in a written case study on my portfolio.

Authentication System | *Node.js, Express.js, MongoDB, React.js, JWT*

- Built signup and login flows with **JWT**-based sessions, **bcrypt** password hashing, and protected API routes on Express and MongoDB.

Digital Marketing Agency Platform | *Next.js, React.js, Headless WordPress, REST API*

- Built a Next.js/React front end that renders content from a headless WordPress CMS over REST APIs, with reusable components optimized for **Core Web Vitals** and Lighthouse scores.

Other work: delivered 6 client websites (WordPress, custom post types, ACF, REST integrations) from Figma designs to deployment.

Technical Skills

Languages: JavaScript (ES6+), Java, PHP, SQL, HTML5, CSS3
CS Fundamentals: Data Structures & Algorithms (basic–intermediate), Object-Oriented Programming, REST API Design
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, SCSS
Databases: MongoDB, MySQL
Cloud & DevOps: AWS (EC2), Docker, Linux, VPS Hosting, DNS, Cloudflare/CDN, Git, GitHub
Tools & Practices: Figma, Vite, Google Lighthouse, Agile, Cross-Browser Testing
CMS: WordPress, Headless WordPress, Elementor, ACF

Education

JNCT College of Technology Graduated 2024
B.Tech in Computer Science and Engineering (CGPA: 8.5/10) *India*
